

## SECTION 06 82 00 — PART 3: EXECUTION (FRP)

Note: Condensed installation guidance for FRP based on shop drawings and Wilson Composites product sheet.

### 3.1 PREPARATORY WORK

- Verify site conditions meet tolerances. Structural framing must be sized to support FRP parts.

### 3.2 INSTALLATION

- Install FRP per approved shop drawings.
- Use concealed fasteners when possible.
- Shim where needed; avoid over-torqueing.

### 3.3 CUTTING & PATCHING

- Cut with diamond/composite blades; clean and patch using gelcoat putty or Bondo depending on finish.
